

Sample PDF for LangChain PDF Loader

This is a simple sample PDF you can use to test your LangChain PyPDFLoader. The text here should be extracted correctly when you run your Python script.

Topics included on this page:

- Artificial Intelligence
- LangChain
- Retrieval-Augmented Generation (RAG)
- Embeddings and Vector Databases

Page 2

You can test page splitting too. PyPDFLoader loads each page as a separate document object.

Example query for your project: 'What topics are mentioned in the PDF?'
